Chief Executive Officer

## Eric Brock Voted Co-Chair of the Commercial Drone Alliance

*Brock will work closely with the Board and CDA members to help support broader industry collaboration and ecosystem development across the commercial drone industry*

**BOSTON, MA / January 21, 2025 / Ondas Holdings Inc.** (NASDAQ: ONDS), ("Ondas", or the "Company"), a leading provider of private industrial wireless networks and commercial drone and automated data solutions, is pleased to announce that Eric Brock, Chairman and CEO of Ondas, has been appointed as Co-Chair of the Commercial Drone Alliance (CDA) Board of Directors.

The CDA, an independent non-profit organization led by key members of the commercial drone industry, collaborates closely with key policymakers at the Federal Aviation Administration (FAA), Department of Transportation, White House, and Congress to educate and champion the future of the drone industry. Mr. Brock joined the CDA Board in July 2023 and now steps into this leadership position to work closely with the Board and CDA members to help support broader industry collaboration and ecosystem development as drone adoption begins to accelerate.

"It's an honor to be appointed as Co-Chair of the CDA Board," stated Eric Brock, Chairman and CEO of Ondas. "The CDA continues to play a crucial role in advocating and advancing public policy initiatives to support the commercial drone sector as it enters a substantial growth phase. To support this growth, it is essential to deepen engagement across the drone ecosystem – from drone systems and service providers to supply chain participants and financial markets. I believe the CDA can engage with this ecosystem and mobilize collaboration to help foster the scalable growth of the drone industry to the benefit of the American public."

Lisa Ellman, Executive Director of the CDA, stated, "We are thrilled to welcome Eric as Co-Chair, particularly given his proven leadership at Ondas and his commitment to advancing public policy and industry collaboration. His appointment further strengthens our mission to safely integrate drones into the National Airspace System and to unlock this transformative technology's full potential."

### About Ondas Holdings Inc.

Ondas Holdings Inc. ("Ondas") is a leading provider of private wireless data solutions via Ondas Networks Inc. ("Ondas Networks") and commercial drone solutions through Ondas Autonomous Systems Inc. via its wholly owned subsidiaries American Robotics, Inc. ("American Robotics" or "AR") and Airobotics LTD ("Airobotics"), which we operate as a separate business unit called Ondas Autonomous Systems.

Ondas Networks is a developer of proprietary, software-based wireless broadband technology for large established and emerging commercial and government markets. Ondas Networks' standards-based (802.16s), multi-patented, software-defined radio FullMAX platform enables Mission-Critical IoT (MC-IoT) applications by overcoming the bandwidth limitations of today's legacy private licensed wireless networks. Ondas Networks' customer end markets include railroads, utilities, oil and gas, transportation, aviation (including drone operators) and government entities whose demands span a wide range of mission critical applications.

Ondas Autonomous Systems Inc. (OAS) specializes in designing, developing, and marketing autonomous drone solutions via its two advanced drone platforms: the Optimus System, the world's first FAA-certified small UAS (sUAS) for aerial security and data capture, and the Iron Drone Raider, a counter-drone system designed to combat hostile drones. Both platforms are highly automated, AI-powered, and capable of continuous, remote operation for critical defense, infrastructure, industrial, and government applications. American Robotics and Airobotics have achieved industry-leading regulatory milestones, including the first-ever FAA Type Certification for the Optimus System and the first drone system approved by the FAA for automated beyond-visual-line-of-sight (BVLOS) operations without an on-site human operator.

Ondas Networks, American Robotics and Airobotics together provide users in defense, homeland security, public safety and other critical industrial and government security and infrastructure markets with improved connectivity, situational awareness and data collection and information processing capabilities.

Ondas Networks, American Robotics and Airobotics together provide users in defense, homeland security, public safety and other critical industrial and government security and infrastructure markets with improved connectivity, situational awareness and data collection and information processing capabilities.
